**LATEX POWDER XLRG**

**LATEX POWDER FREE SMALL**

**LATEX POWDER FREE MED**

**LATEX POWDER FREE LG TEX**

**LATEX POWDER FREE XLRG**

LATEX GLOVES from The Safety Zone provide the best feel, fit and dexterity. Our gloves are available in both lightly powdered and powder free options in a variety of thicknesses. Our lightly powdered latex gloves are produced with a food grade corn starch powder, making donning easier especially when hands are wet. Powder free gloves go through an extra process of chlorinating the gloves to ease donning. Our polymer coated latex gloves provide an additional barrier to prevent latex proteins from touching the skin.

# NITRILE

**NITRILE POWDER FREE MED**

**NITRILE POWDER FREE MED**

**NITRILE POWDER FREE LRG**

**NITRILE POWDER FREE LRG**

**NITRILE POWDER FREE LRG**

**NITRILE POWDER FREE XLG**

NITRILE GLOVES are the perfect compromise between latex and vinyl. Nitrile is made from an allergy safe compound that feels a lot like latex but it's much stronger, costs less, and is more comfortable to wear. Nitrile is perfect for demanding applications, especially cleaning and dishwashing. Our lightly powdered versions are produced with a food grade corn starch powder, making it easier to take them on or off – especially with wet hands. Powder free gloves go through an extra process of chlorinating the gloves to ease donning.

**VINYL POWDER LRG**

**VINYL POWDERED XLRG**

## **VINYL**

VINYL GLOVES are our most popular general purpose glove. Vinyl gloves are stronger than polyethylene gloves, and offer greater comfort for jobs like food preparation, bussing, and cleaning where gloves will be worn for a greater period of time. Vinyl gloves are also less expensive than nitrile and latex gloves. Our lightly powdered vinyl gloves are produced with a food grade corn starch powder, making donning easier especially when hands are wet. Powder free gloves go through an extra process of chlorinating the gloves to ease donning.
